ErgoBoard™ Pro Keyboard with USB Ports

Input with comfort and accuracy

Engineered with an advanced aerodynamic design, the ErgoBoard Pro from Belkin creates smooth edges along all sides of the keyboard.

Its split-key format matches the natural posture of your hands when placed on any flat surface with the arms bent at the elbow; your hands position themselves naturally at slight inward angles toward each other. This great design combines a symmetrical profile with outstanding, ergonomic comfort.

The Belkin ErgoBoard Pro incorporates such advanced features into its design as a tactile key switch and an integrated wrist rest. The ErgoBoard Pro also offers Control-key shortcut labels on the key caps to allow you to quickly use the CTRL+ function for frequently used commands, such as CTRL+C for copy and CTRL+V for paste. The high-quality data markings ensure the long life of letters and symbols on your keys. Its durable rubber membrane uses our advanced, QuietType™ technology to enable quiet use and excellent keystroke response.
